

Welcome to GFader

It's a volume knob. A knob to control volume. You know, also known as "gain". That's it.

Hints

- Turn the knob anti-clockwise to decrease the volume, or clockwise to increase the volume.

Interface

The GFader GUI features a single knob, which is labelled "Gain".

Gain: The actual volume knob.

License

1. GVST plug-ins are provided to the user at no cost. While every GVST plug-in is tested to the best of the developer's ability, no warranty or guarantee is offered to the end user.
2. No suggestions made by the developer or his representatives (i.e., freely offered support) are to be taken as an implied warranty or guarantee.
3. These plug-ins may only be distributed by the official GVST website, or by parties explicitly given permission by the developer.
4. GVST plug-ins are to be distributed only in their original form as intended by the developer (i.e., the unaltered archive).
5. GVST plug-ins are freeware, meaning you are never under any obligation to pay for them! However, should you wish to help support continued development of GVST software, please consider donating through the official website.
